Press Release

Lonza to Present at HPCI CEE Technical Seminar About Protecting Skin from Environmental Aggressors

South Plainfield, NJ (USA), 26 September 2016 – Lonza Consumer Care (Stand 430) will present at HPCI Central and Eastern Europe's (HPCI CEE) technical seminar on the topic of building environmental protection into skin-care formulations. The company will highlight the effects of environmental stressors on the skin and give details about its Biodynes[®] O₃ bioactive and LaraCare[®] A200 film-former for protection in skin-care formulations. In addition to its skin-care active ingredients for environmental protection, Lonza also will showcase its extensive portfolio of preservation and delivery systems, chassis ingredients and aesthetic modifiers. HPCI CEE will take place 28 and 29 September in Warsaw, Poland.

"As a society we're moving away from anti-aging products and towards looking after ourselves, protecting ourselves and looking as good as we can at the age that we are," said Ann Steinmann, Technical Marketing Manager – EMEA, Personal Care, Lonza Consumer Care, who will present, "Environmental Protection Through the Ages."

"Our collective skin-care objective as we age has less to do with looking younger and more to do with looking healthy and using certain products to help protect and enhance our skin," she said.

Steinmann said people today are exposed to chemicals such as ozone (O₃) that have a harmful effect on skin, and she described Lonza's solutions for all types of applications.

Biodynes[®] O₃ bioactive, a skin-care active ingredient manufactured using fermentation, protects the skin from environmental aggressors such as O₃. It improves moisturization, lowers transepidermal water loss (TEWL), reduces the appearance of wrinkles and fine lines, and improves skin firmness. The performance of Biodynes[®] O₃ bioactive inspired Lonza's definition of skin protection called Ozone Protection Factor™ or OPF™.

LaraCare[®] A200, a multi-functional larch-tree active, enhances the skin's barrier properties. Clinical testing has shown its effectiveness in reducing TEWL thereby contributing moisturization benefits to skin care formulations. A naturally-derived, mild, non-irritating and water-dispersible polymer, LaraCare[®] A200 imparts film-forming properties, helps reduce the appearance of superficial fine lines and reduces TEWL.

About Lonza Consumer Care – Personal Care

Lonza Consumer Care has long been the world's leading supplier of active antidandruff agents, with its Zinc Omadine[®] product considered the gold standard in the antidandruff shampoo market. Lonza Consumer Care also supplies a wide array of other hair and skin care products, including biotechnology-derived active ingredients, naturally-derived and organic preservatives and other products, proteins, emollients, delivery systems and more.

About Lonza

Lonza is one of the world's leading and most-trusted suppliers to the pharmaceutical, biotech and specialty ingredients markets. We harness science and technology to create products that support safer and healthier living and that enhance the overall quality of life.

Not only are we a custom manufacturer and developer, Lonza also offers services and products ranging from active pharmaceutical ingredients and stem-cell therapies to drinking water sanitizers, from the vitamin B3 compounds and organic personal care ingredients to agricultural products, and from industrial preservatives to microbial control solutions that combat dangerous viruses, bacteria and other pathogens.

Founded in 1897 in the Swiss Alps, Lonza today is a well-respected global company with more than 40 major manufacturing and R&D facilities and approximately 9,800 full-time employees worldwide. The company generated sales of CHF 3.8 billion in 2015 and is organized into two market-focused segments: Pharma&Biotech and Specialty Ingredients. Further information can be found at www.lonza.com.
