

PRESS RELEASE

HAUTLENCE REVOLUTIONISES THE HOUR DISPLAY BY GIVING TIME A NEW DIMENSION

LA CHAUX-DE-FONDS, March 2019 – To mark Baselworld 2019, HAUTLENCE is presenting its eighth manufacture calibre and launching an exceptional timepiece: the HL SPHERE. HAUTLENCE is reconnecting with its original identity by going back to basics and offering an innovative way to display the time. Following on from the jumping hour disc and the half-trailing hour chain, it now presents a jumping hour that spins on a sphere.

A blue sphere occupies the left-hand portion of the case, magnificently showcased by a sapphire crystal with a small dome, attracting everyone's attention. It features twelve engraved numerals and rotates on itself through three rotation axes to reveal the current hour. This hypnotic dance, which initially appears totally random, actually follows a strict choreography, dictated by four conical gears that move around two crossed spindles inclined at an angle of 21 degrees. Two polished titanium cases featuring a blue PVD treatment adorn this conical differential to create a yin and yang watchmaking composition that forms a sphere.

To the right of the sphere is a retrograde minute display with a hand that travels along a fine and elegant minute track that opens onto the movement and partly reveals the balance. This aperture brings the gear train into view, which slows down the course of the minute hand when it returns to zero, regulating its speed so as to reduce impact forces. The differential and snail used to trigger the jumping hour can also be seen beneath the minute hand. The minute track and the applied silvered diamond-polished minute numerals are fixed to an intermediary sapphire crystal dial with a smoked metallic finish that adds to the piece's transparency.

The white gold case of the HL SPHERE adopts HAUTLENCE's signature TV screen shape. Reworked to reinterpret the brand's signature codes, the case has been enlarged and equipped with a wider opening on the dial, to truly highlight the complication. With its balanced proportions, the HL SPHERE model sits perfectly on the wrist. The white gold notched crown, engraved with the HAUTLENCE logo, is used to wind the watch and set the time. An alligator-leather strap, in the same blue shade as the sphere, adds the final touch to the piece.

The HTL 501-I hand-wound calibre beats at the heart of the HL SPHERE model. Entirely developed, designed and produced by HAUTLENCE's watchmakers, this movement is the perfect culmination of technical and aesthetic expertise. The skeletonised balance bridge allows the owner to admire the oscillations of the proprietary balance spring produced by Precision Engineering AG, HAUTLENCE's sister company. The equally skeletonised drum and ratchet reveal the barrel spring, thereby providing a simple yet ingenious visual indication of the power reserve. The reliable HTL 501-I calibre is fitted with a safety mechanism that prevents incorrect manipulation during reverse time setting, leading the movement to simply rotate freely without any risk of damaging the mechanism.

With the HL SPHERE, HAUTLENCE is opening a new chapter in its history and confirming its leading role in independent fine watchmaking.

A brand-new chapter in HAUTLENCE history

Founded in 2004, HAUTLENCE – whose name itself is an anagram of Neuchâtel – pays tribute to the birthplace of the watchmaking art. The brand has been praised by watch collectors and aficionados from across the world for bringing a new dynamism to the art of fine watchmaking.

With annual production of around 200 pieces, HAUTLENCE has eight calibres designed and developed inhouse, whilst also relying on external partners for the movements used in certain collections.

In strategic terms, HAUTLENCE can count on support from MELB Holding, an independent family watchmaking group which has been offering its experience and network since 2012, with the synergies between HAUTLENCE and the group sure to grow.

HAUTLENCE is pushing the boundaries of traditional watchmaking codes, uniting them with innovative mechanical solutions and an unlimited universe borrowed from the various arts, combining design, architecture, and movement. The brand takes its inspiration from this to create new approaches to time display, which it uses to elevate the two key dimensions of space and time. Ever conscious of a functional relationship with beauty, HAUTLENCE invents timepieces with completely new contours and depths, respecting every stage and every person involved in their production.

Beyond Swiss Made - the "HORLOGERIE SUISSE" stamp

HAUTLENCE timepieces are created and produced in Switzerland, in Neuchâtel and the Jura mountains, in the very highest tradition of Swiss watchmaking, and are signed with the label "Horlogerie Suisse". The components are produced externally using a network of thirty-five partners and subcontractors, all based in the Neuchâtel/Jura region.
